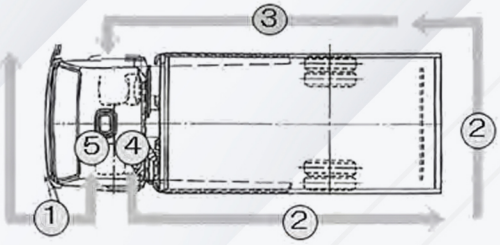
DAILY 5 MINUTE CHECK-UP

Identify and correct abnormal conditions before they lead to breakdowns by performing a thorough five-minute daily vehicle inspection. This routine check helps detect early signs of wear, damage, or malfunction, allowing timely action to prevent costly repairs, unexpected downtime, and safety risks. Regular inspection ensures the vehicle remains reliable, efficient, and road-ready.



1 CHECK THE FRONT

- Brake fluid level and impurities.
- Window & Wipers.
- Side mirrors & lights. (front side)
- Oil/Fuel/Water Leakage

2 CHECK THE LEFT SIDE

- Left front tire / Wheel nut
- Pre fuel filter
- Battery fluid level
- Rear tires/Wheel nut
- Spare tire
- Rear lights

3 CHECK THE RIGHT SIDE

- Right rear tires/Wheel nut.
- Fuel tank cap.
- Level of coolant.
- Power steering fluid level.
- Fan belt. (10kg-10mm)
- Right front tire/Wheel nut.
- Water tank

4 GET IN THE CAB

- Tilt down thecab
- Seat position
- Steering position
- Side mirror view
- 3 Pedal (A/B/C)
- Parking brake (15 kg - 6 Notch)

5 CHECK THE ENGINE

- Engine start-up and listen for abnormal sounds.
- Inspect the various lights.

> *"Daily inspection takes just 5 minutes of moving around the truck!"*
